Anti-Executable Standard New Features

Version 3.0

- New White List scanning and parsing architecture
- Multiple White Lists available
- Central White List management and deployment
- White Lists can be viewed and edited
- White Folder feature added to exempt a CD-ROM, USB device, disk, or network drive from Anti-Executable protection
- Windows 2000/XP 32-bit/XP 64-bit/Vista 32-bit/Vista 64-bit support added and Windows 95/98/Me support dropped

Version 2.3

- Allow or Block execution of applications from local CD-ROM / DVD drives while Anti-Executable is On
- Ability to specify where the log file is saved
- Ability to minimize the white list scanning process during installation

Version 2.2

- Added an Exempted Folders feature to include all subfolders within a directory
- Added a Trusted Applications feature to include all executables recursively within a specified directory

Version 2.1

- Japanese localization

Version 2.0

First official release
